

momentum on stability should be carefully examined to improve the performance of GCM submodels.

### **Acknowledgment**

The author is grateful to the staff of the Center for Global Environmental Research of the National Institute for Environmental Studies ( Drs. S. Nishioka, K. Otsubo, H. Harasawa and Messrs T. Wada, K. Yamazaki and K. Fukuwatari ) for supporting his use of the CGER supercomputer and to Dr. S. Takeshita for inviting him as a visiting scientist of the National Institute for Environmental Studies. The author also thanks Dr. R. Weisburd for his English corrections of this manuscript. This work was supported by both the CGER and the Japanese Ministry of Education, Science and Culture through grant-in-aid (No. 07455087).
